Anne Maschler — Principal
Cesar Chavez LA Arts Magnet (LAUSD)
1001 Arroyo Street, San Fernando, CA 91340
ACM0248@lausd.net
(818) 837-6428

Dear Principal Maschler,

I am applying for the 9-12 math teaching position at Chavez LA Arts Magnet for the 2026-2027 school year. I bring a BSc in Mathematics and Computer Science from Brown, fifteen years as a software engineer at Apple, Cisco, and Goldman Sachs, and five years founding and teaching at Dragon and Crane Dojo — a small private school I built from the ground up. I am turning toward LAUSD because I want to spend the next phase of my work in a public school classroom serving the families I most want to serve.

An arts magnet is exactly the kind of place I want to teach math. The artists I have worked with — including the graphic-design and chess students in my dojo curriculum — already think in proportion, structure, rhythm, and pattern; they have just not been told that those instincts are mathematical. I want to give them that vocabulary, and to teach in a building where the work students do in their other classes makes my job easier rather than harder. Beyond the dojo, I have written and self-published my own curriculum materials and tracked individual student progress over multi-year arcs — the lesson-design and classroom-management muscles are real.

My industry background also lets me answer the question every math student eventually asks — when am I going to use this? I have used it: settlement systems at Goldman Sachs, network management APIs at Apple, clinical AI infrastructure at Deep6. Including for students whose center of gravity is in the arts, that "when am I going to use this" deserves a real answer from someone who has lived inside one.

Thank you for your consideration. I would welcome the opportunity to discuss how I can best serve Chavez's students and families.

Sincerely,

David Chung
