Oscar Vazquez — Principal

John F. Kennedy Senior High School (LAUSD)

11254 Gothic Ave, Granada Hills, CA 91344

OXV1741@lausd.net

(818) 271-2900

Dear Principal Vazquez,

I am applying for the math teaching position at John F. Kennedy Senior High School for the 2026-2027 school year, having reviewed the AP math program flyer linked in your posting. I bring a BSc in Mathematics and Computer Science from Brown, fifteen years as a software engineer at Apple, Cisco, and Goldman Sachs, and five years founding and teaching at Dragon and Crane Dojo — a small private school I built from the ground up. I am turning toward LAUSD because I want to spend the next phase of my work in a public school classroom serving the families I most want to serve.

AP-track students extend trust to their teachers in advance; I want to honor that trust with both rigor and the warmth that comes from a teacher who has actually lived inside the subject. Calculus and statistics did not stay theoretical for me — they were the daily tools of work I did at Goldman Sachs Treasury, Apple's network operations center, and a Series A network security startup. At Dragon and Crane I have written and self-published my own curriculum, sequenced multi-year arcs in chess, coding, and physics, and tracked individual student progress, so the lesson-design and classroom-management foundations are already in place.

That industry background also lets me answer the question every math student eventually asks — when am I going to use this? I have used it: settlement systems at Goldman, network management APIs at Apple, clinical AI infrastructure at Deep6. I want Kennedy's AP students to hear those stories from someone who has lived inside them.

Thank you for your consideration. I would welcome the opportunity to discuss how I can best serve Kennedy's students and families.

Sincerely,

David Chung
