(818) 609-2500

Dear Principal Segal,

I am applying for the math teaching position at Mulholland Middle School for the 2026-2027 school year. I bring a BSc in Mathematics and Computer Science from Brown, fifteen years as a software engineer at Apple, Cisco, and Goldman Sachs, and five years founding and teaching at Dragon and Crane Dojo — a small private school I built from the ground up. I am turning toward LAUSD because I want to spend the next phase of my work in the place where my own trajectory began: a public school classroom.

Middle school math is the hardest grade band to teach well, because it is where mathematical instincts form — or harden into the wrong shape. I have watched that shaping happen in slow motion across the off-the-mat curriculum I write and teach at my dojo — coding, chess, reading, physics — and I know how often the difference between "I can't" and "oh, I see it" comes down to one adult refusing to let a kid give up. The skills transfer the other direction too: I have already done the work of sequencing multi-year curriculum, self-publishing student materials, and tracking individual progress.

My industry background also lets me answer the question every math student eventually asks — when am I going to use this? I have used it: settlement systems at Goldman Sachs, network management APIs at Apple, clinical AI infrastructure at Deep6 AI. Math was not preparation for those jobs; it was the substance of them, and I want Mulholland's students to hear that from someone who has lived inside the answer.

Thank you for your consideration. I would welcome the opportunity to discuss how I can best serve Mulholland's students and families.

Sincerely,

David Chung
