Dear Principal Sanchez,

I am applying for the math teaching position in the Medical & Health Careers Magnet at Northridge Middle School for the 2026-2027 school year. I bring a BSc in Mathematics and Computer Science from Brown, fifteen years as a software engineer at Apple, Cisco, and Goldman Sachs — including four years at Deep6 AI, a clinical AI startup — and five years founding and teaching at Dragon and Crane Dojo, a small private school I built from the ground up. I am turning toward LAUSD because I want to spend the next phase of my work in a public school classroom serving the families I most want to serve.

A health-careers magnet is the rare place where the answer to "when am I going to use this?" can be given with examples drawn from the same hallway. Biostatistics, dosage math, the calculations a clinician actually runs — that is the version of math I want to teach to students already pointed toward those careers. My years at Deep6 AI, building infrastructure for clinical trial matching that ran on real patient data, give me both stories and an instinct for which math fluency actually matters downstream. At Dragon and Crane I have already done the work of sequencing multi-year curriculum, self-publishing student materials, and tracking individual progress, so the lesson-design foundation is in place.

The broader industry background also lets me answer the question for students whose interests pull elsewhere — settlement systems at Goldman Sachs, network management APIs at Apple, infrastructure at network security and clinical AI startups. Math was the substance of all of it, and I want Northridge magnet students to hear that.

Thank you for your consideration. I would welcome the opportunity to discuss how I can best serve the magnet program and Northridge's families.

Sincerely,

David Chung
